Red-crested Pochard. Spring. Breeding plumage. Adult. Male ().

RED-CRESTED POCHARD (*Netta rufina*)

IDENTIFICATION

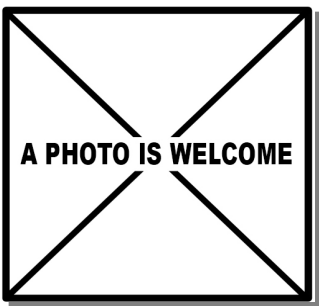

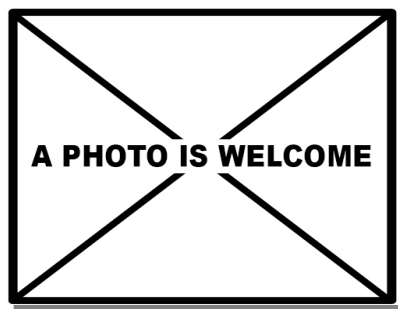

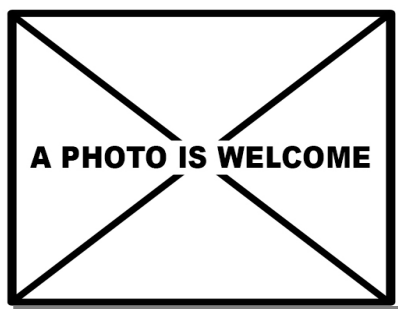

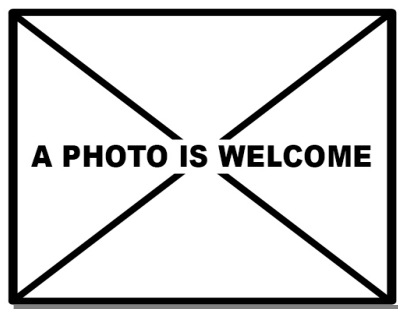

53-57 cm. **Male** with red-chestnut head; black breast and tail coverts; white flanks; wings chestnut with a white band; red bill. **Female** pale brown; chestnut crown and white cheeks; bill greyish with pink tip.

SIMILAR SPECIES

This species is unmistakable.

SEXING

Male in **breeding** plumage unmistakable with head and nape red-chestnut; breast and upper and undertail coverts black; white flanks; white leading edge of wing; reddish iris and bill; in **non breeding** plumage similar to **female** but distinguishable by red iris and bill and by white leading edge of wing. **Female** with brown body; head brown on crown and white on cheeks and hindneck; breast and tail coverts brownish; leading edge of wing similar as rest of wing coverts; iris reddish-brown and bill brown with pinkish tip. **Juvenile** birds similar but **male** has whiter the leading edge of wings.

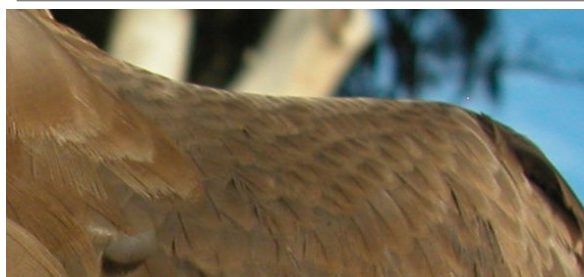

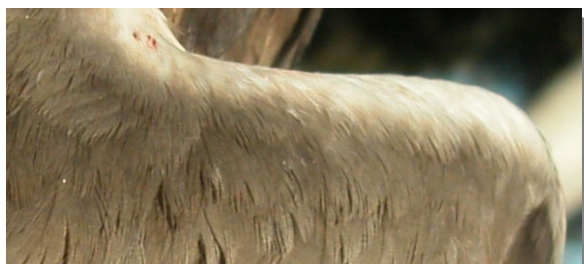

Red-crested Pochard. Sexing. Pattern of head: top breeding male; middle non-breeding male; bottom female

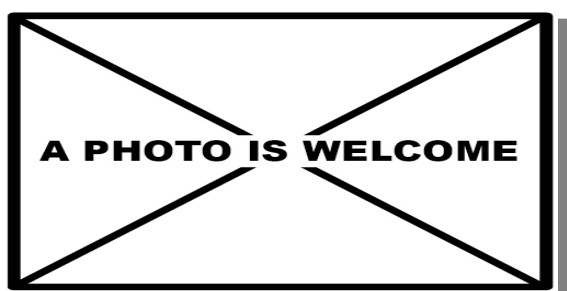

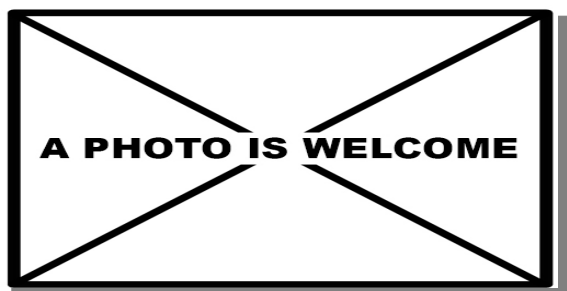

Red-crested Pochard. Sexing. Pattern of breast: top male; bottom female

Red-crested Pochard. Sexing. Juvenile: pattern of upper lesser coverts: top male; bottom female

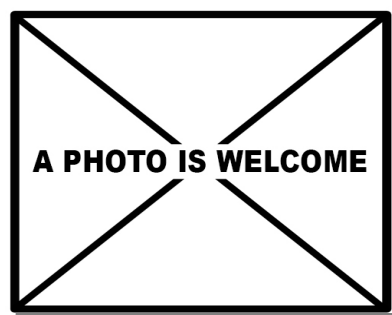

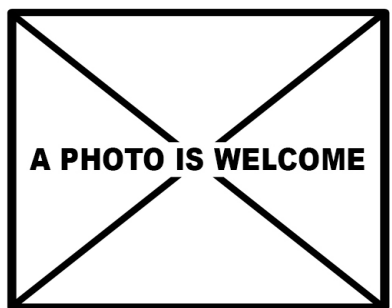

AGEING

3 types of age can be recognized:

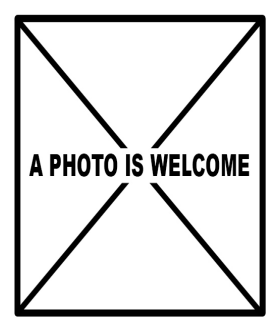

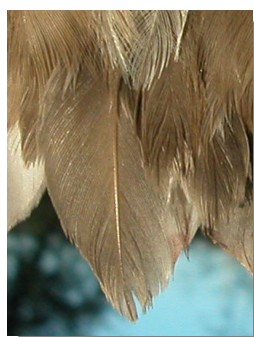

1st year summer similar to **female** but with narrow tail feathers with notched tips; greater coverts narrow with rounded tips; grey bill; pale brown iris.

1st year autumn/2nd year spring with juvenile flight feathers retained. In **breeding** plumage, **male** with duller and mottled underparts and narrower leading edge of wing than the **adult male**; **female** with upperparts and crown greyer-brown than the **adult female**.

Adult with greater coverts broad and square shaped, mainly the inner coverts; non-notched tail feathers. In **breeding** plumage, **male** with black underparts.

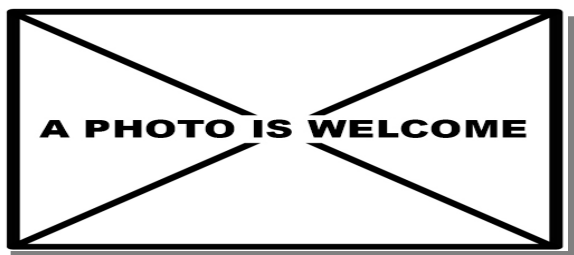

Red-crested Pochard. Ageing. Pattern of head and bill: top adult female; bottom juvenile

Red-crested Pochard. Ageing. Pattern of tail feathers: left female; right juvenile
