Goshawk. Adult. Male (06-IV)

NORTHERN GOSHAWK (*Accipiter gentilis*)

IDENTIFICATION

Male: 48-61 cm; **female:** 58-64 cm. Short and rounded wings and long tail; yellow or orange iris; tail with 4-5 bands; grey brown upperparts; pale and barred underparts. **Juveniles** are brown with pale underparts mottled brown.

Kestrel. Female

Sparrowhawk. Juvenile

Goshawk. Adult. Pattern of head and breast.

Sparrowhawk. Female

Goshawk. Juvenile. Pattern of head and breast.

SEXING

In **adult** birds, **male** with bluish grey upperparts; ear covers deep grey. **Female** with brownish upperparts; ear-coverts light grey or brownish. **Female** with bigger size than **male**. In **juveniles**, plumage of both sexes alike but can be sexed by size.

CAUTION: head and upperparts pattern is individually very variable; size in this species is very different depending on its geographical location (northern birds bigger than southern ones), so it would be necessary to know the geographical origin to sex by size without errors.

SIMILAR SPECIES

Kestrel and **Lesser Kestrel** have long tails, but have dark iris and rufous upperparts. **Female Sparrowhawk** can be very similar to a **male Goshawk** but has a smaller size; **juvenile Sparrowhawk** has barred underparts.

Goshawk Sexing. Pattern of head: top male; bottom female.

Goshawk Sexing. Pattern of upperparts: left male; right female.

AGEING

3 age groups can be recognized:

Juvenile with brown streaked head with only a slight supercilium; feathers of upperparts brown with pale edge; pale underparts with dark vertical streaks; pale yellow iris.

2nd year autumn/3rd year spring with grey brown upperparts with brown and worn retained **juvenile** feathers specially on rump and mantle; with some brown **juvenile** feathers retained on wing coverts, specially on lesser and median coverts; breast feathers with 3 or 4 transversal broad and brown lines, sometimes tinged rufous; sometimes with some narrow, brownish and worn **juvenile** secondaries retained; yellow or yellow-orange iris.

Adult with uniformly dark crown and ear-coverts with clear white supercilium; uniform brown grey or slate-brown upperparts, sometimes with thinly white tipped feathers; breast feathers with 4 or 5 transversal narrow and grey-brown lines, the outermost narrower than the others; if retained secondaries then with **adult** pattern; orange to red iris.

Goshawk Ageing. Pattern of breast feathers: top left adult; top right 2nd year autumn; left juvenile.

Goshawk Ageing. Pattern of upperparts: left adult; right ju-
