Roller. Summer. Adult. Male (03-VI).

EUROPEAN ROLLER (*Coracias garrulus*)

IDENTIFICATION

28-31 cm. In **breeding** plumage, reddish chesnut upperparts, with bluish rump; blue greenish underparts with white streaks on throat; blue greenish head; tail with blue feathers, with green central pair; dark wings with blue coverts; black bill; yellowish legs. Duller plumage after **postbreeding** moult.

Roller. Adult: pattern of head and upperparts.

SIMILAR SPECIES

This species is unmistakable

SEXING

Plumage of both sexes quite alike, but extreme birds can be sexed: **male** with intense blue rump; pure blue lesser and median coverts. **Female** with blue and green feathers admixed on rump; lesser and median coverts with green feathers. **CAUTION:** some **2nd year males** are very similar to **adult females**.

Roller. Adult. Sexing. Pattern of rump: left male; right female.

Roller. Adult. Sexing. Pattern of primary coverts: top male; bottom female.

Roller. Adult. Sexing. Pattern of wing coverts: top male; bottom female.

AGEING

3 age groups can be recognized:

Juvenile resembles an **adult** but duller and fresher; tip of the outermost tail feather without a black spot.

2nd year similar to **adult** but with unmoulted **juvenile** greater coverts, flight and tail feathers very worn.

Adult in **spring/summer** with colourful plumage; flight and tail feathers worn; tip of the outer tail feather with a black spot. **CAUTION:** in **autumn**, body feathers moulted in **postbreeding** moult resemble **juvenile**, but **adults** have worn flight feathers.

Roller. Ageing. Pattern of head: top adult; bottom juvenile.

Roller. Ageing. Pattern of breast: left adult; right juvenile.

MOULT

Complete **postbreeding** moult; moult of body and flight feathers start in breeding areas in June, suspended before migration and then finished in wintering sites. Partial **postjuvenile** moult in wintering areas involving only body feathers, lesser and median coverts and some tail feathers (usually central and outer pairs). Both age classes have a **prebreeding** moult changing only body feathers.

PHENOLOGY
