

**IDENTIFICATION OF CETTI'S WARBLER (*Cettia cetti*), SAVI'S WARBLER (*Locustella luscinioides*) AND EURASIAN REED WARBLER (*Acrocephalus scirpaceus*)**

**ALL AGES**

All ages can be separated by tail pattern and bristles near the base of bill.

Cetti's Warbler: with bristles near the base of bill; rounded tail with ten feathers.

Savi's Warbler: without bristles near the base of bill; rounded tail with twelve feathers.

Eurasian Reed Warbler: with bristles near the base of bill; squared tail with twelve feathers.
